Description

We have the pleasure in offering for sale this appealing **two bedroom mid terraced dwellinghouse** situated within the popular Stoneywood area of the city, close to local amenities. The property is immaculately presented with fresh neutral décor, making an ideal purchase for a young couple of first-time buyers. The spacious accommodation spans over two floors and comprises of: Entrance hallway with a staircase leading to the upper floor; living room on semi-open plan to the dining kitchen; bathroom with an over bath shower. Upper Floor: Two double bedrooms. Outside there are very well-maintained gardens together with resident's and on street parking to the rear of the property. Heating is provided by a gas central heating system and all windows are double glazed. The fitted flooring, light fittings and blinds will be included in the sale.

- Appealing Two Bedroom Mid Terraced Dwellinghouse
- Living Room on Semi Open Plan to the Dining Kitchen
- Two Double Bedrooms
- Bathroom with an Over Bath Shower

- Gas Central Heating
- Double Glazing
- Well Maintained Gardens
- Resident's & On Street Parking

Location Local amenities are well catered for within Stoneywood including primary and secondary schools, a range of shops including a Co-op supermarket and the popular Marks & Spencer food hall. There are also fantastic recreational facilities including a library, squash club, bowling green and community centre. The area is popular with families and within easy reach by car, bus or rail of the City Centre. Aberdeen International Airport is also within easy reach as is the train station at Dyce, and the industrial estates at Dyce and the Bridge of Don. In addition, the AWPR is located nearby for easy access to both north and south of the city.

Directions

Travel north to Bucksburn from Aberdeen City Centre via George Street, Auchmill Road, and Inverurie Road following the signposts for Dyce. Proceed for some distance onto Stoneywood Road and the property is located on the left as indicated by our "For Sale" sign.

Accommodation comprises

(Ground Floor)

Entrance Hallway: A uPVC exterior door with fanlight gives access to the entrance hallway; carpeted staircase with handrail leading to the upper floor; electric meter cupboard; further cupboard housing the hot and cold water tanks; smoke detector; ceiling light fitting; matwell; laminate flooring; glass panelled door leads to the living room.

Living Room: 3.21m x 3.09m (10'6" x 10'2") approx. The living room is positioned to the front of the house and is on semi-open plan to the dining kitchen; twin window fitted with vertical blinds; radiator; pendant light fitting; laminate flooring.

Dining Kitchen: 6.89m x 2.14m (22'7" x 7'0") approx. The well equipped dining kitchen is fitted with an excellent range of beech effect base and wall mounted cabinets linked by co-ordinated work surfaces

and ceramic wall tiles; breakfast bar; 1.5 x stainless steel sink and drainer with a mixer tap; gas hob with a cooker hood extractor above; built-in oven; integrated dishwasher; space for a washing machine, fridge and freezer; two windows with a rear garden aspect, one fitted with vertical blinds and the other with "Venetian" blinds; under stair storage cupboard; radiator; pendant light fitting and bar spotlight fitting.

Bathroom: The bathroom is fitted with a white three-piece suite comprising of: W.C., wash hand basin and bath complete with an over bath electric shower; frosted window to the front of the house; radiator; ceiling light fitting; stripped and varnished floor.

(Upper Floor)

Window to the rear of the house; smoke detector; ceiling light fitting; fitted carpet.

Bedroom 1: 4.26m x 3.22m (14'0" x 10'7") approx. Bright and airy double bedroom with a twin window to the front of the house fitted with "Venetian" blinds; two built-in wardrobes with sliding doors providing great hanging and storage facilities; two chest of drawers; smaller window to the rear of the building; hatch to loft; bar spotlight fitting; laminate flooring.

Bedroom 2: 4.27m x 2.47m (14'0" x 8'1") approx. Spacious second bedroom overlooking the front of the property; twin window fitted with "Venetian" blinds; smaller window to the rear of the house; built-in wardrobe with sliding mirrored doors; bar spotlight fitting; laminate flooring.

(Outside)

There are very well-maintained gardens to the front and rear of the house. The front garden is laid for low maintenance to granite chips and has a paved pathway leading up to the front door. The enclosed rear garden is mainly laid to grass with a granite chipped area, paved pathway, timber garden shed, rotary dryer and outdoor water tap. Note: The gas meter is located at the front of the property.

Parking: There is resident's and on street parking to the rear on Pheonix Place.

Ofcom

This information is a prediction and actual services may be different depending on my circumstances and precise location. Provided by Ofcom, last retrieved on 16/05/2025. 5G coverage is not included in this data.

The data displayed on broadband coverage availability uses source data from Ofcom. The predicted speeds provided in the API data are provided by the leading UK ISPs. We understand that Ofcom did not receive data for every premise in the UK, and that Ofcom continue to work with industry to fill in the gaps. If no predictions are shown for your address, this does not necessarily mean broadband is not available and we suggest that you check availability on the ISP websites.

The data displayed on mobile coverage availability uses source data made available by Ofcom which is based on data from the mobile operators about how strong they think signal levels are at every location in the UK. Each mobile operator has a slightly different approach to displaying coverage on its own map, including assumptions on the handsets used, levels of call reliability and the expected signal loss when indoors or in car. Because Ofcom brings all mobile operator data together in a single place and holds it to a single, independent standard, the mobile coverage availability information above may display different levels of coverage than those seen on the operators' websites. We would therefore recommend you also check the mobile provider's coverage checker. Mobile coverage data is created by coverage modelling, and since this is based on computer predictions is not error free.

Ofcom update the source data regularly (every month) and the mobile network operators update theirs, but there may be times when the maps are based on slightly different data and therefore show different coverage.

For further information about the Ofcom APIs, read their FAQs available here.

survey report on:

Property address	239 Stoneywood Road Stoneywood Aberdeen AB21 9JS
Customer	Karen Melvin (Executry)
Customer address	239 Stoneywood Road Stoneywood Aberdeen AB21 9JS
Prepared by	Shepherd Chartered Surveyors
Date of inspection	12/05/2025

www.shepherd.co.uk

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property¹.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Seller's Agent or relative to the property, they will be obliged to indicate this by marking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

Prior to 1 December 2008, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

¹ Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:

- the Seller:
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether
 or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report².

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless

² Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct.

they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the Surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;
- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;

- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 - DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments

being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the Report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 1 <u>Category 3:</u> Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2 <u>Category 2:</u> Repairs or replacement requiring future attention, but estimates are still advised.
- 3 Category 1: No immediate action or repair is needed.

WARNING: If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use

communal grounds, parking areas, and other facilities;

- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

Description	The subjects comprise a mid terraced one and a half storey dwellinghouse.
Accommodation	The accommodation comprises:
	Ground Floor: Entrance hallway, living room and dining room and kitchen on open plan and bathroom with w.c.
	First Floor: Hallway and two bedrooms.
Gross internal floor area (m²)	70 sq.m or thereby.
Neighbourhood and location	The subjects form part of an established residential locality lying within the Stoneywood suburb of Aberdeen some four miles north west of Aberdeen city centre. The subjects were originally erected on behalf of the Local Authority and within the local area an adequate range of services and facilities are available. The subjects do lie in close proximity to a busy road and the Aberdeen Airport flight path and as a result some noise disturbance can be anticipated.
Age	Built around 1965
Weather	Dry and Sunny.
Chimney stacks	Visually inspected with the aid of binoculars where appropriate.
	None.

Roofing including roof space Sloping roofs were visually inspected with the aid of binoculars where appropriate. Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally. Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property. If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so. The roof over the property is timber framed, pitched and clad in tiles with a tilled ridge. There are flat felt dormer projections. No inspection was possible to any eaves spaces as there are no visible access hatches. Rainwater fittings Visually inspected with the aid of binoculars where appropriate. Pvc gutters and downpipes set into the drainage system. Main walls Visually inspected with the aid of binoculars where appropriate. Foundations and concealed parts were not exposed or inspected. The main walls are constructed of cavity brick/blockwork and are externally finished with a wet dash render incorporating pointed brick features. Windows, external doors and joinery Internal and external doors were opened and closed where keys were available. Random windows were opened and closed where possible. Doors and windows were not forced open. Windows are of timber design and are fitted with sealed double glazed units. The front and rear doors are of pvc design fitted with sealed double glazed units. The fascias are of timber design with asbestos style soffits beneath.

External decorations	Visually inspected.
External desorations	visually inspected.
	Part pvc finishes otherwise painted.
Conservatories / porches	N/A
Communal areas	N/A
Garages and permanent outbuildings	Visually inspected.
	There is no garage or outbuildings pertaining to the subjects. Within the rear garden there is a timber and felt shed. This was not inspected.
Outside areas and boundaries	Visually inspected.
	To the front of the property is an area of garden ground which is mainly laid to stone chips. Boundaries are defined with stonework, timber fencing and low rise kerbing.
	To the rear of the property is an area of garden ground which is mainly laid to lawn with areas of paving slabs. Boundaries tot he rear are defined with timber fencing and roughcast blockwork.
[
Ceilings	Visually inspected from floor level.
	Ceilings are lined in plasterboard sheets.
Internal walls	Visually inspected from floor level.
	Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
	Internal walls and partitions are lined in plasterboard sheets or are plastered "on the hard".

Floors including sub floors	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted. Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch. Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point. Flooring is of suspended timber. Our inspection of the flooring was limited due to fitted floor coverings. The sub-floor access hatch could not be lifted.
Internal joinery and kitchen fittings	Built-in cupboards were looked into but no stored items were moved. Kitchen units were visually inspected excluding appliances. Internal doors are of timber panel and timber glass panel design sitting within timber skirtings and facings. The kitchen is equipped with a range of wall and base units, worktop surfaces, integrated appliances and a sink and drainer. The staircase is of timber design and is of adequate angle and height.
Chimney breasts and fireplaces	N/A
Internal decorations	Visually inspected. The internal walls and ceilings are finished in emulsion painted decorations. The internal joinery works are finished in painted and varnished decorations.
Cellars	N/A

Electricity

Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.

Electricity is from mains public supplies. The electricity meter and fuse box can be found within the ground floor hallway.

Gas

Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.

Gas is from mains public supplies. The gas meter can be found externally.

Water, plumbing, bathroom fittings

Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.

No tests whatsoever were carried out to the system or appliances.

Water is from mains public supplies. The internal plumbing where seen is of pvc and copper supply pipes with pvc waste pipes.

The bathroom is fitted with a white 3-piece suite with a shower over the bath.

Heating and hot water

Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.

No tests whatsoever were carried out to the system or appliances.

Heating and hot water are provided by a gas fired central heating boiler. The boiler is wall mounted within the kitchen and supplies radiators throughout.

Hot water is stored within an insulated cylinder which can be found within a cupboard off the hallway at ground floor level.

Drainage	Drainage covers etc. were not lifted.
	Neither drains nor drainage systems were tested.
	Drainage is to the mains public sewer.

Fire, smoke and burglar alarms Visually inspected. No tests whatsoever were carried out to the system or appliances. Smoke detectors have been installed. All Scottish homes require a smoke alarm to be installed in the room most frequently used for living purposes and in every circulation space on each floor. A heat alarm also needs to be installed in each kitchen. The alarms need to be ceiling mounted and interlinked. Where there is a carbonfuelled appliance such as a boiler, open fire or wood burner, a carbon monoxide detector is also required. We have not assessed or tested any existing equipment and it is the purchasers responsibility to confirm that the property will comply with these standards following a change of

ownership.

Any additional limits to inspection

For flats / maisonettes

Only the subject flat and internal communal areas giving access to the flat were inspected.

If the roof space or under-building / basement is communal, reasonable and safe access is not always possible. If no inspection was possible, this will be stated. If no inspection was possible, the surveyor will assume that there are no defects that will have a material effect on the valuation.

The building containing the flat, including any external communal areas, was visually inspected only to the extent that the surveyor is able to give an opinion on the general condition and standard of maintenance.

An inspection for Japanese Knotweed was not carried out. This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property. Identification of Japanese Knotweed is best undertaken by a specialist contractor.

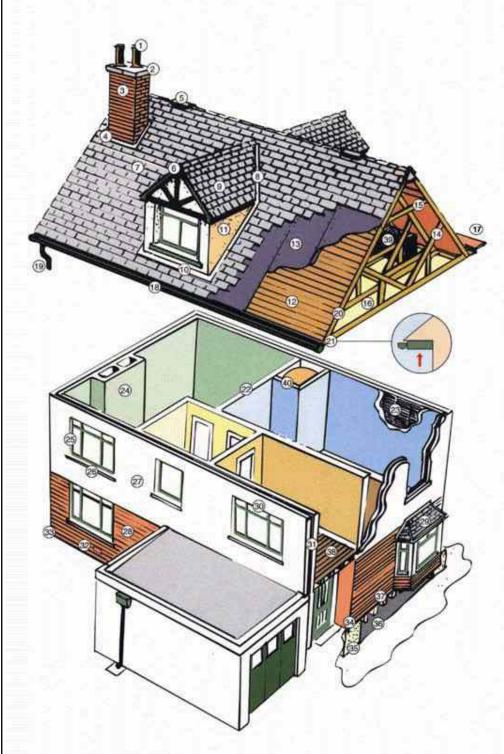

Windows and external doors were not all fully opened or tested.

No sub-floor inspection was possible. The sub-floor access hatch could not be lifted.

Our inspection of the apex roof void was limited to a head and shoulders inspection only. This is unfloored and insulation material has been placed over the joists.

No inspection has been possible to the eaves spaces.

Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

- 1) Chimney pots
- 2) Coping stone
- 3 Chimney head
- (4) Flashing
- 5) Ridge ventilation
- 6 Ridge board
- (7) Slates / tiles
- 8 Valley guttering
- 9 Dormer projection
- 10 Dormer flashing
- 11) Dormer cheeks
- (12) Sarking
- 13) Roof felt
- (14) Trusses
- (15) Collar
- 16) Insulation
- (17) Parapet gutter
- (18) Eaves guttering
- (19) Rainwater downpipe
- 20) Verge boards/skews

- 22) Partition wall
- 23) Lath / plaster
- (24) Chimney breast
- 25) Window pointing
- 26) Window sills
- 27) Rendering
- 28) Brickwork / pointing
- 29 Bay window projection
- (30) Lintels
- (31) Cavity walls / wall ties
- 32) Subfloor ventilator
- (33) Damp proof course
- (34) Base course
- 35) Foundations
- 36) Solum
- 37) Floor joists
- 38) Floorboards
- 39) Water tank
- 40) Hot water tank

2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	•

Structural movement	
Repair category	1
Notes	There was no evidence of significant structural movement within the limitations of our inspection.

Dampness, rot and infestation	
Repair category	1
Notes	At the time of inspection the property was found to be in a maintained order consistent with its age and type of construction.

Chimney stacks	
Repair category	N/A
Notes	

Roofing including roof space	
Repair category	2
Notes	The roof over the property is original and is clad in tiles Chipped and broken tiles were noted. Roof tiles will require increased maintenance as they approach the end of their efficient lifespan and maintenance and expenditure in this respect should be anticipated.
	There are flat felt dormer projections to the front and rear roof pitches. We will point out that flat roof coverings will have a limited lifespan and can fail without notice.
	No inspection was possible to any eaves spaces. Our inspection of the apex roof void was limited due to insulation material.

Rainwater fittings	
Repair category	1
Notes	Some chipped sections of guttering were noted.
	We would highlight that it was not raining at the time of our inspection and we would recommend that all rainwater fittings be inspected during heavy rainfall in order to ensure they are free from defect.

Main walls	
Repair category	1
Notes	Within the limitations of our inspection, no significant defects were noted, however normal levels of maintenance are recommended.

Windows, external doors and joinery	
Repair category	1
Notes	Windows were not all fully opened or tested, and it should be appreciated that some defects are only evident during certain weather conditions. Within the limitations of our inspection, no significant defects were noted.

External decorations	
Repair category	1
Notes	Paint finished and decorated external surfaces will require redecoration on a regular basis.

Conservatories/porches	
Repair category	N/A
Notes	

Communal areas	
Repair category	N/A
Notes	

Garages and permanent outbuildings	
Repair category	1
Notes	The timber shed was not inspected.

Outside areas and boundaries	
Repair category	1
Notes	Boundary walls and fences should be regularly checked and maintained as necessary.

Ceilings	
Repair category	1
Notes	Within the limitations of our inspection no significant defects were noted.

Internal walls	
Repair category	1
Notes	Within the limitations of our inspection no significant defects were noted.

Floors including sub-floors	
Repair category	1
Notes	Due to fitted carpets and floor coverings no detailed inspection of floors was possible and accordingly no comment can be made on their condition.
	No sub-floor inspection was possible as the sub-floor access hatch could not be lifted.

Internal joinery and kitchen fittings	
Repair category	2
Notes	Broken mirrors were noted to the wardrobe doors within the master bedroom. The kitchen and internal joinery works have suffered from wear and tear.

Chimney breasts and fireplaces		
Repair category	N/A	
Notes		

Internal decorations	
Repair category	1
Notes	The property is in reasonable decorative order.

Cellars	
Repair category	N/A
Notes	

Electricity	
Repair category	2
Notes	The electrical fuse box and installation is original to the property and would not comply with current standards. The Institution of Engineering Technology recommends that inspections and testings are undertaken at least every five years and on a change of occupancy. It should be appreciated that only the most recently constructed or re-wired properties will have installations which fully comply with IET regulations.

Gas	
Repair category	1
Notes	In the interests of safety and in light of recent regulations it would be prudent to have all gas appliances checked by a Gas Safe registered contractor.

Water, plumbing and bathroom fittings		
Repair category	1	
Notes	The sanitary suite appears to be original to the property. The tiles have been painted over. No tests have been undertaken of the system, however within the limitations of our inspection, no significant defects were noted. No inspection has been possible to enclosed timbers beneath wet appliances and no comment has been made on the condition of unseen areas. Watertight seals will require to be regularly checked and replaced, to prevent water damage to adjoining areas.	

Heating and hot water		
Repair category	2	
Notes	The central heating boiler and installation appears to be in excess of 25 years old. Service records should be obtained and checked. In the absence of service documentation further advice should be obtained from a qualified heating engineer to ascertain the condition, efficiency, and life expectancy of the system. It is assumed that the central heating system has been properly installed,	
	updated and maintained to meet with all current regulations and standards with particular regard to fluing and ventilation requirements.	

Drainage	
Repair category	1
Notes	All foul and surface water drainage is assumed to be to the main public sewer. The system was not tested.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

Structural movement	1
Dampness, rot and infestation	1
Chimney stacks	N/A
Roofing including roof space	2
Rainwater fittings	1
Main walls	1
Windows, external doors and joinery	1
External decorations	1
Conservatories/porches	N/A
Communal areas	N/A
Garages and permanent outbuildings	1
Outside areas and boundaries	1
Ceilings	1
Internal walls	1
Floors including sub-floors	1
Internal joinery and kitchen fittings	2
Chimney breasts and fireplaces	N/A
Internal decorations	1
Cellars	N/A
Electricity	2
Gas	1
Water, plumbing and bathroom fittings	1
Heating and hot water	2
Drainage	1

Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

Category 1

No immediate action or repair is needed.

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. Accessibility information

Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property:

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Wherea lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres:

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?		Ground & First Floor		
2. Are there three steps or fewer to a main entrance door of the property?	Yes	X	No	
3. Is there a lift to the main entrance door of the property?	Yes		No	X
4. Are all door openings greater than 750mm?	Yes		No	X
5. Is there a toilet on the same level as the living room and kitchen?	Yes	X	No	
6. Is there a toilet on the same level as a bedroom?	Yes		No	X
7. Are all rooms on the same level with no internal steps or stairs?	Yes		No	X
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes	X	No	

4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

It is assumed that there are no statutory, town planning, road proposals or environmental matters which are likely to have an adverse effect on the property.

The road and footpath adjoining the site are made up and are assumed to be adopted by the Local Authority.

Where defects or repairs have been identified within this report it is recommended that, prior to entering into any legally binding sale or purchase contract, further specialist's or contractor's advice and estimates should be obtained, to establish the implications, if any, on a potential offer to purchase or the sale price likely to be achieved for the property.

Estimated reinstatement cost for insurance purposes

For Reinstatement Cost Assessment purposes, it is recommended that the subjects be insured for a sum of not less than £190,000 (ONE HUNDRED AND NINETY THOUSAND POUNDS STERLING).

This figure is the estimate of the cost of rebuilding the premises and bears no direct relationship to current market value.

Valuation and market comments

Having considered matters, taking account of our general observations on site, we are of the opinion that the Market Value of the subjects in their present condition and with the benefit of vacant possession may be fairly stated in the sum of £140,000 (ONE HUNDRED AND FORTY THOUSAND POUNDS STERLING).

Dwellings

Scotland

239 STONEYWOOD ROAD, ABERDEEN, AB21 9JS

Dwelling type: Mid-terrace house
Date of assessment: 12 May 2025
Date of certificate: 14 May 2025
Total floor area: 70 m²

Total floor area: 70 m²

Primary Energy Indicator: 415 kWh/m²/year

Reference number: 0110-2172-9150-2995-3405 **Type of assessment:** RdSAP, existing dwelling

Approved Organisation: Elmhurst

Main heating and fuel: Boiler and radiators, mains

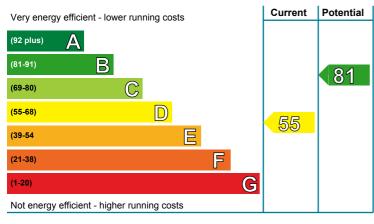

gas

You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO₂ emissions by improving your home

Estimated energy costs for your home for 3 years*	£4,578	See your recommendations
Over 3 years you could save*	£1,593	report for more information

^{*} based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

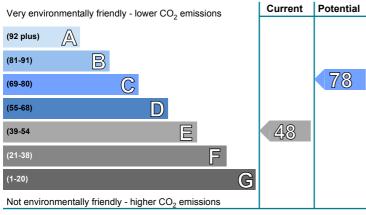

Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band D (55)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Environmental Impact (CO₂) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO_2) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band E (48)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years	
1 Floor insulation (suspended floor)	£800 - £1,200	£264.00	
2 Hot water cylinder thermostat	£200 - £400	£366.00	
3 Condensing boiler	£2,200 - £3,000	£789.00	

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Cavity wall, filled cavity	★★★☆☆	***
Roof	Pitched, limited insulation (assumed) Roof room(s), insulated	****** ***	★☆☆☆☆ ★★☆☆☆
Floor	Suspended, no insulation (assumed)	_	_
Windows	Fully double glazed	***	***
Main heating	Boiler and radiators, mains gas	****	★★★★ ☆
Main heating controls	Programmer, room thermostat and TRVs	****	★★★★ ☆
Secondary heating	None	_	_
Hot water	From main system, no cylinder thermostat	***	***
Lighting	Low energy lighting in 75% of fixed outlets	****	****

The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO₂ emissions, running costs and the savings possible from making improvements.

The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 73 kg CO₂/m²/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 5.1 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 2.9 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£3,324 over 3 years	£2,406 over 3 years	
Hot water	£972 over 3 years	£297 over 3 years	You could
Lighting	£282 over 3 years	£282 over 3 years	save £1,593
Totals	£4,578	£2,985	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Recommended measures		Indicative cost	Typical saving	Rating after improvement	
		Indicative cost	per year	Energy	Environment
1	Floor insulation (suspended floor)	£800 - £1,200	£88	D 57	E 50
2	Hot water cylinder thermostat	£200 - £400	£122	D 61	D 55
3	Replace boiler with new condensing boiler	£2,200 - £3,000	£263	D 68	D 65
4	Solar water heating	£4,000 - £6,000	£58	C 70	D 68
5	Solar photovoltaic panels, 2.5 kWp	£3,500 - £5,500	£393	B 81	C 78

Alternative measures

There are alternative improvement measures which you could also consider for your home. It would be advisable to seek further advice and illustration of the benefits and costs of such measures.

Micro CHP

Choosing the right improvement package

About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

1 Floor insulation (suspended floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Suspended floors can often be insulated from below but must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about floor insulation is available from many sources including www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation. Building regulations generally apply to this work so it is best to check with your local authority building standards department.

2 Cylinder thermostat

A hot water cylinder thermostat enables the boiler to switch off when the water in the cylinder reaches the required temperature; this minimises the amount of energy that is used and lowers fuel bills. The thermostat is a temperature sensor that sends a signal to the boiler when the required temperature is reached. To be fully effective it needs to be sited in the correct position and hard wired in place, so it should be installed by a competent plumber or heating engineer. Building regulations apply to this work, so it is best to check with your local authority building standards department whether a building warrant will be required.

3 Condensing boiler

A condensing boiler is capable of much higher efficiencies than other types of boiler, meaning it will burn less fuel to heat this property. This improvement is most appropriate when the existing central heating boiler needs repair or replacement, however there may be exceptional circumstances making this impractical. Condensing boilers need a drain for the condensate which limits their location; remember this when considering remodelling the room containing the existing boiler even if the latter is to be retained for the time being (for example a kitchen makeover). Building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority building standards department and seek advice from a qualified heating engineer.

4 Solar water heating

A solar water heating panel, usually fixed to the roof, uses the sun to pre-heat the hot water supply. This can significantly reduce the demand on the heating system to provide hot water and hence save fuel and money. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. You could be eligible for Renewable Heat Incentive payments which could appreciably increase the savings beyond those shown on your EPC, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

5 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present: There are none provided for this home

Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit https://energysavingtrust.org.uk/energy-at-home for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	10,652	(568)	N/A	N/A
Water heating (kWh per year)	3,373			

About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greeners cotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.
